

Initial Landing Page

Landing page.stays the same throughout the interaction with the site.
Initial view only displays the aside on the left with information about how to play, difficulty levels.

User Clicks Let’s Play Button

When a user clicks the let’s play button they are shown a pop up modal which asks for a username and difficulty. These inputs cannot be blank.
If the input is valid the user will then be shown a populated game area with a number of cards dependant on the difficulty chosen.

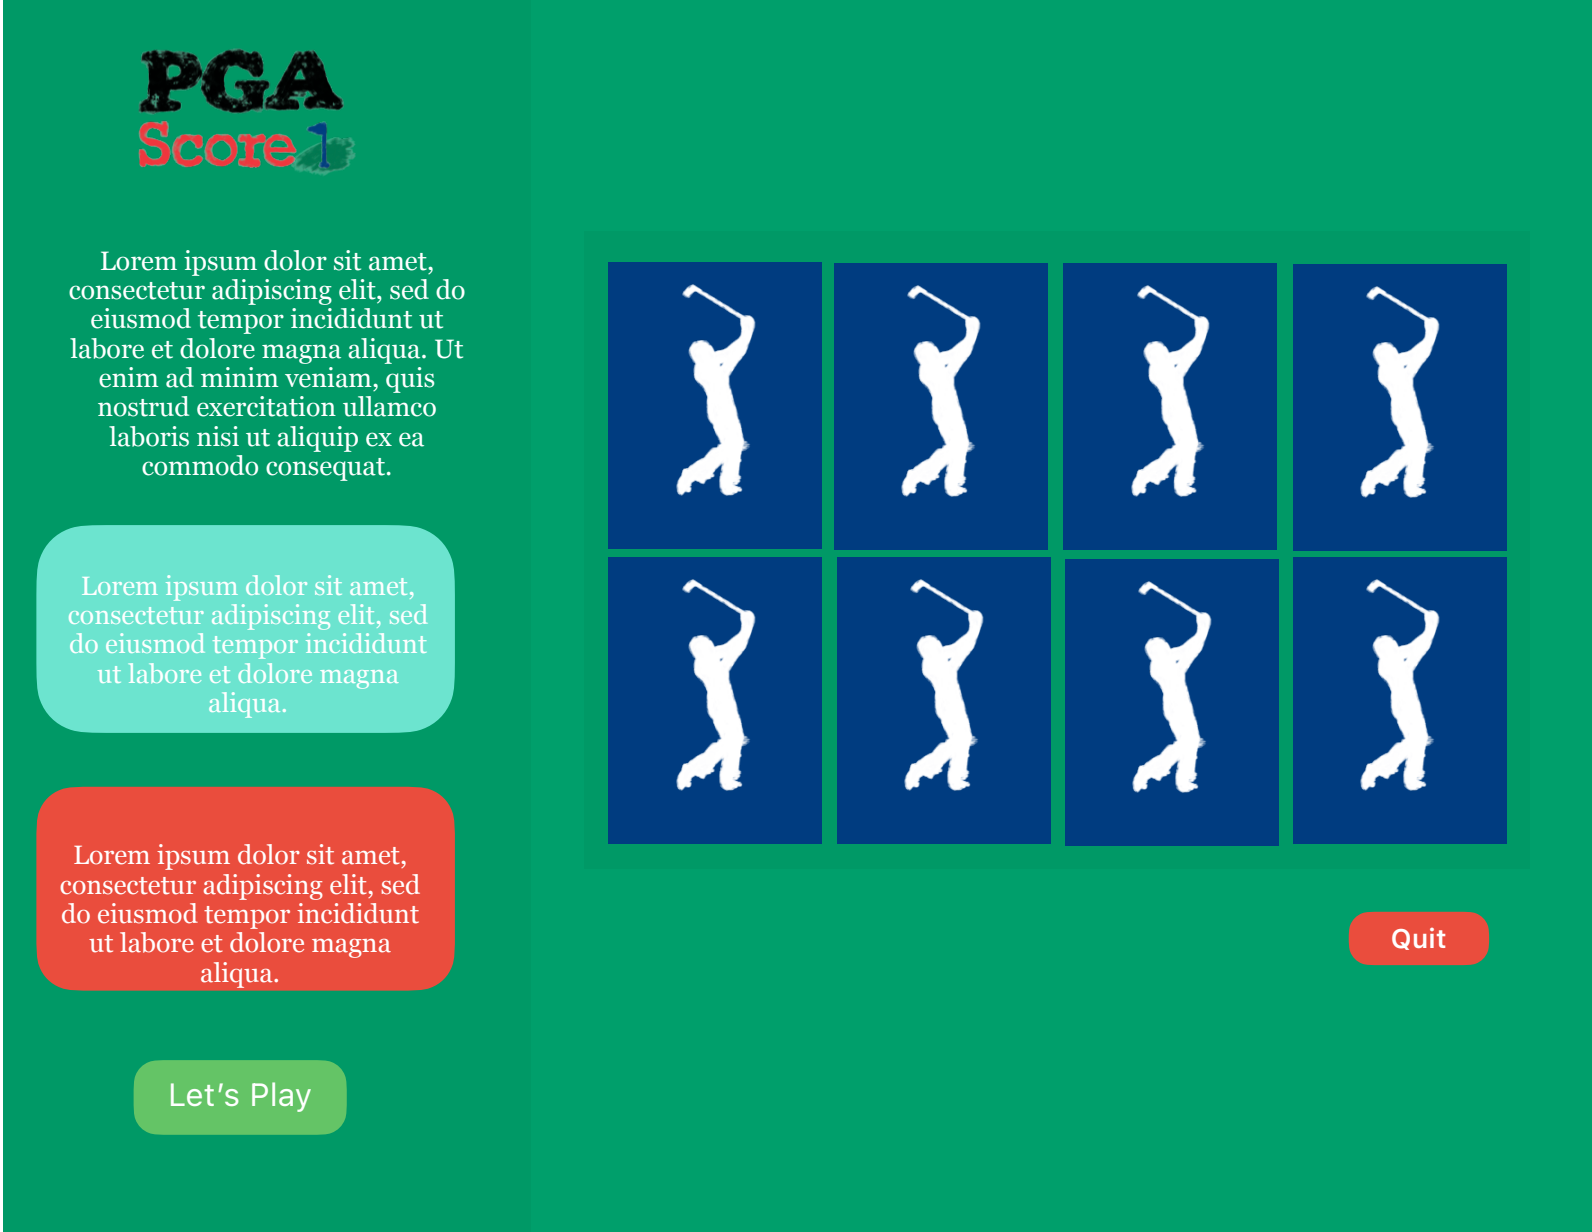

User selects the “Hard” difficulty

If the user selects a the hard difficulty they are shown 12 cards in the game area.

User selects the “Easy” difficulty

If the user selects a the easy difficulty they are shown 8 cards in the game area.

User finds the matching pairs of all cards

When the user finds all matching pairs in the game area a pop up modal will show alerting them they have won the game.
